

PEST MANAGEMENT ACADEMY PROVIDES THE FOLLOWING PEST CONTROL TRAINING OPTIONS TO THE PEST CONTROL INDUSTRY:

Book Now!

HACCP/FOOD SAFETY

CAPE TOWN

3 JULY 2012

FUMIGATION

CAPE TOWN

2-4 JULY 2012

Option 1

Skills Program NQF Level 2

3-day practical training program covering all fields of registration. It is held at the Academy but can be conducted at a venue of your choice depending on the amount of students. The Skills Program is aimed at pest control operator assistants and persons who might have reading difficulties or for those who don't speak English as a first language.

Courses:

- Structural Pest Control
- Weed Control
- Termites & Wood Destroying Insects
- Bag, Bulk & Structural Fumigation

You do not need to complete workbooks, but you must complete a test and be able to read and interpret labels and MSDS. A practical assessment is also done to assess competency. All above courses require 6 months practical experience (except for the Fumigation course which requires 12 months experience) under the supervision of a registered operator, after which you can apply for restricted P registration with the Department of Agriculture. If you have already gained the required experience, you can apply for registration immediately after completing the skills program. Restricted registration means that you need to be employed at a pest control company where you are supervised by a person holding a full P registration.

Option 2

Skills Program NQF Level 4

3-day practical training program presented at NQF level 4 - a higher level than the restricted NQF 2 above, covering all fields of registration. It is held at the Academy but can be conducted at a venue of your choice depending on the amount of students.

Courses:

- Structural Pest Control
- Weed Control
- Termites and Wood Destroying Insects
- Structural Fumigation or Bag and Bulk Fumigation

You are expected to complete examinations and workbooks and you must show competency in theoretical work and practical scenarios. This skills program is aimed at people who want to be qualified as a fully registered pest control operator and is suitable for people working on their own without supervision, in other words your average pest control operator.

You need to gain 6 months practical experience under the supervision of a Registered operator. The Bag, bulk and Structural Fumigation course requires a minimum of 12 months practical experience. After completion, you can apply with the Department of Agriculture for P Registration. If you have already gained the required experience, you can apply for registration immediately after completing the skills program.

Option 3

FET Certification

The Pest Control Operations NQF Level 4 Course

This course is aimed at people who want a largely theory-based qualification and who are more involved in the supervision or management elements of the pest control industry. A full P-registration will be granted to all students who complete this course. This is a correspondence or distance learning course and rewards the successful candidate with a National Certificate. It covers all fields of registration.

The **Core Fundamental Module 1** is compulsory and has to be completed first and covers all the basic elements in pest control. Thereafter, you can choose which pest control field you would like to specialize in, and pick one or more of the following

Modules 2-10

- Module 2:** Apply, direct and monitor weed control programs.
- Module 3:** Apply, direct and monitor the control of health and nuisance pests.
- Module 4:** Direct and monitor the preservation of timber in structures.
- Module 5:** Inspect structures for wood destroying organisms.
- Module 6:** Fumigate commodities using toxic gasses.*
- Module 7:** Fumigate soil using toxic gasses.*
- Module 8:** Fumigate structures using toxic gasses.*
- Module 9:** Fumigate marine vessels using toxic gasses.*
- Module 10:** Apply, direct and monitor control measures for subterranean termites.

Examinations may be completed at any time, as soon as the learner is ready and feels confident to sit the examination, which will be online at the Academy. On completion of the examinations for the compulsory module and the one elective module, together with completed workbooks, an integrated assessment will be done with the learner. This is conducted once a month in Pretoria, or twice a year in Durban and Cape Town.

You also have the option of attending our 3 day skills course at no extra cost, which caters for the practical side in the field you have selected. You will then be issued with a certificate issued under the auspices of the Department of Higher Education and Training.

6 Months practical experience must be obtained under the supervision of a Registered Operator. *These courses require a minimum of 12 months practical experience. you can apply with the Department of Agriculture for P Registration. If you have already gained the required experience, you can apply for registration immediately after completing the program.
