Pest Management Academy

WHAT ARE YOU GOING TO LEARN ON THE FUMIGATION COURSE?

There are only two true fumigants registered with a third one in the pipeline and at Pest Management Academy we will demonstrate the use of Methyl Bromide and Aluminium Phosphide gasses. We will explain their properties, uses, advantages and disadvantages. We concentrate on the safety aspects and show you how to use the fumigants effectively and help you to choose the correct application and methods.

The following topics are covered during the Fumigation course:

- Inspection procedures
- Identification of pests in commodities and timber
- Selection of fumigants
- Selection, calibration and calculation of equipment
- Safety precautions
- Application techniques
- Monitoring and testing methods and equipment
- Aeration/Ventilation techniques

On completion of the Fumigation course you will be able to assess a situation to ensure that the fumigation can be done safely and effectively and you will be able to perform the fumigation using the correct methods and procedure for a successful fumigation.

See our schedule for the next dates for our Fumigation course. Don't miss out on the Fumigation course scheduled for **Cape Town 14-16 November 2011**.
